Profile

A Backend Engineer proficient in Node.js, responsible for designing, building, and maintaining server-side applications. database management (MongoDB). Experience with server-side frameworks like Express.js, knowledge of authentication mechanisms, and deployment processes are also part of their expertise.

Education

Bachelor's Degree of computer science, 09/2020 – 07/2024 | Zagazig University
Faculty of computer and informatics

Professional Experience

Trainee Back-End Affsquare 1/2024 – 5/2024

1. learning to develop efficient, scalable, and secure backend systems.
2. Training includes gaining experience with RESTful API development, understanding database management (MongoDB), and working with server-side frameworks like Express.js.

Projects

Smart Farm

Is an innovative application designed for smart farming, focusing on plant disease detection and treatment using advanced technologies. The application leverages Node.js for its backend infrastructure to provide a robust, efficient, and scalable solution. The system includes two primary roles: user and engineer

Courses

- 1- **UI / UX** Information Technology institute (ITI) 8/2022 – 09/2022 | online
 - 2- **SEF FUTURE** 12/2022 – 05/2023
 - **Frontend Development:** Mastery of HTML, CSS, JavaScript, and modern frameworks like Angular and React, focusing on creating responsive and interactive user interfaces.
 - **Backend Development:** In-depth understanding of server-side technologies including Node.js and MongoDB, with a focus on building scalable and efficient backend systems, API development, and database management.
-

Skills

- JavaScript
- OOP (Object Oriented Programming)
- Nodejs
- Data structure
- Algorithm
- C++
- Java
- Python
- HTML, CSS, BOOTSTRAB
- Mongo DB
- Sql
- Problem Solving

Tools

- VS Code
- Figma
- Postman
- Problem Solving
- Git
- Robo3t

Languages

- Arabic ,Native
- English , Intermediate
